Summary

I am a talented software engineer with a vast understanding of HTML5, CSS3, JavaScript, and Python. With an understanding of these three languages with various frameworks associated with them, I can develop full-stack websites and I'm also free to learn new technologies. Having worked on various projects during my studies and freelancing career, I intend to make the world a better place through code.

Skill Highlights

- Project management
- Imaginative Thinking
- Complex problem solver
- Teamwork
- Creative eye for design
- Front-end web development
